

Invitation & Agenda

14th GERMAN LS-DYNA FORUM

10 - 12 October 2016, Bamberg, Germany

Courtesy of Dr. Ing. h.c. F. Porsche AG

PLATINUM SPONSORS

Dear LS-DYNA user,

We would like to cordially invite you to the 14th German LS-DYNA Forum from 10 - 12 October in Bamberg, Germany. The agenda offers more than 100 technical presentations by users from various industries who will share their experiences with LS-DYNA and LS-OPT. Furthermore, software developers from LSTC and DYNAmore provide insight into the potential applications of their latest implementations. The Forum is rounded off with six workshops covering popular topics.

It is notable that the modeling of fiber reinforced plastics play again an important role this year. In particular, to close the gap between process and serviceability simulations, DYNAmore is developing the mapping tool "Envyo", which is already used in a number of presentations. Detailed information about the use of "Envyo" can be obtained in a dedicated workshop. Furthermore, the classic applications of short-duration dynamics are still of growing interest. Also well represented are the applications of function and component simulation that can be computed with the implicit features of LS-DYNA.

Following this, the 14th German LS-DYNA Forum offers an ideal platform to exchange your experiences and insights with other users across the LS-DYNA product range as well as the associated CAE process chains. But have a look for yourself. We are convinced that you will find one or the other interesting lecture from your application field.

As usual, there will also be an exhibition of selected hardware and software manufacturers offering an exquisite chance to gather information on the latest news and trends around LS-DYNA. Last but not least, several employees of the DYNAmore GmbH will be available for your disposal to answer your questions or simply provide tips and tricks on the LS-DYNA product range.

In addition to the Forum, we also offer 11 English-spoken seminars on LS-DYNA and LS-OPT, which are held by experienced instructors and need to be booked separately. Conference participants will receive a 10% discount on the seminar fees. In the morning before the Forum there will be a free-of-charge workshop on integrative simulation of fiber-reinforced plastics. More information about the accompanying seminars can be found at the end of this brochure.

We hope to have aroused your interest and look forward to welcoming you in Bamberg.

Sincerely yours

Welcome Kongresshotel Bamberg

Monday, 10 October

Exhibition	09:00 - 12:00	Pre-Conference Workshop	Integrative simulation of short-/long glass fiber reinforced plastics with LS-DYNA
	starting 11:00	Hotel foyer	Registration
	13:30 - 15:40	Plenum	Keynote Presentations *
	16:20 - 17:20	Parallel sessions	Crash Safety (Airbag & Pressure) Process (Metal Forming)
	17:50 - 18:50	Parallel sessions	Crash (Batteries) Safety (Dummies) Process (Metal Forming) Workshop: Performance
19:15 - 24:00	Exhibition	Food, drinks and live music in the exhibition hall	

Tuesday, 11 October

Exhibition	07:30	Running LS-DYNA	Bring your Running Shoes
	09:00 - 10:20	Parallel sessions	Optimization / Robustness Materials (Parameter Ident.) Process (EFR Polymers) Workshop: Blast Analysis
	11:00 - 12:20	Parallel sessions	SDM / Compression Materials (SFR Polymers) Process (Welding / Cooling) Workshop: Implicit
	13:40 - 15:10	Plenum	Keynote Presentations *
	15:50 - 17:10	Parallel sessions	Crash (Composites) NVH LS-DYNA in the Cloud Workshop: Welding Analysis
	17:40 - 19:00	Parallel sessions	Arena 2036 Materials (Misc.) Drop Test / Impact Workshop: Data Management
	19:15 20:00	Exhibition Hegelsaal	Reception in the exhibition hall Gala dinner in the "Hegelsaal"

Wednesday, 12 October

Exhibition	09:00 - 10:20	Parallel sessions	Implicit Simulations Connection Modeling Finite Element Technology Workshop: LS-OPT Robustness
	11:00 - 12:20	Parallel sessions	Mechanical Simulations Multiphysics / Control Containment Impact / Rapture Workshop: Mapping Tool Envyo
	13:30 - 15:00	Plenum	Keynote Presentations
15:00	Plenum	Closing remarks	

* Simultaneous translation into English.

PLENUM

KEYNOTE PRESENTATIONS

- 13:30 **Welcome and Introduction**
U. Franz (DYNAmore)
- 13:40 **Recent Developments – Part I**
R. Grimes, J. Wang and other developers (LSTC)
- 14:10 **Modeling and Characterization of Continuous-Discontinuous Long Fiber-Reinforced Polymer Structures**
Prof. T. Böhlke, F. Henning, L. Kärger, Prof. T. Seelig, K. A. Weidenmann (Karlsruhe Institut of Technology)
- 14:40 **Status and Challenges of Safety CAE in Vehicle Development**
S. Frik (Adam Opel)
- 15:10 **Sponsorenvortrag:**
Enabling Effective and Easy to Access Simulation
S. Gillich (Intel); E. Schnepf (Fujitsu Technology Solutions)
- 15:25 **Sponsorenvortrag:**
DELL
D. Detweiler (Dell)
- 15:40 **Coffee break**

PARALLEL

CRASH

- 16:20 **Berücksichtigung des Bake Hardening Effekts bei umgeformten Blechteilen für die Crashsimulation**
D. Riemensperger (Adam Opel)
- 16:40 **Virtuelle Produktentwicklung und Craschauslegung von Stahl-Werkstoffverbundsystemen**
D. Pieronek, L. Kessler, H. Richter, S. Myslowicki (Thyssenkrupp Steel Europe)
- 17:00 **Influence of Submodel Size and Evaluated Functions on the Optimization Process of Crashworthiness Structures**
H. Singh, S. Link, Prof. A. Schumacher (Universität Wuppertal)
- 17:20 **Coffee break**

SAFETY (AIRBAGS AND PRESSURE TUBES)

- Simulation von Kaltgasgeneratoren unter Berücksichtigung des Joule-Thompson-Effekts**
T. Laufer, A. Heym (Takata)
- Update on CPM for Airbag Modelling**
J. Wang (LSTC)
- *DEFINE_PRESSURE_TUBE:**
A Pressure Tube Sensor for Pedestrian Crash
J. Karlsson (DYNAmore Nordic)

PARALLEL

CRASH (BATTERIES)

- 17:50 **Battery Abuse Analysis using LS-DYNA**
P. L'Eplattenier, I. Caldichoury (LSTC); J. Marcicki, A. Bartlett, X. G. Yang, V. Mejia, M. Zhu, Y. Chen (Ford Research and Innovation Center)
- 18:10 **Einbindung der Einzelzellen von Lithium-Ionen-Traktionsspeichern in die Unfallsimulation**
M. Funcke (Forschungsgesellschaft Kraftfahrwesen Aachen); S. Lovski, L. Eckstein (RWTH Aachen)
- 18:30 **Entwicklung eines optimierten Seitencrashkonzepts für das batterieelektrische Fahrzeugkonzept Urban Modular Vehicle**
M. Schäffer, M. Münster, R. Sturm, H. Friedrich (DLR)
- 19:15 **Food, drinks and live music in the exhibition hall**

SAFETY (DUMMIES)

- Correlation Studies for WorldSID-50 and Q10/Q6 Child Dummies in Latest Occupant Simulations**
T. Kotucha (Adam Opel)
- Dummy Models General Update**
F. Schüssler (Humanetics)
- Efficient Seat Positioning for Sled Testing using Implicit Analysis**
G. Laird (Predictive Engineering); D. G. Tari (Zodiac Seats California); S. Pathy (LSTC)

PARALLEL OPTIMIZATION AND ROBUSTNESS

- 09:00 **LS-TaSC Product Status**
K. Witowski (DYNAmore); W. Roux (LSTC)
- 09:20 **Finding the Best Thickness Run Parameterization for Optimization of Tailor Rolled Blanks**
N. Klinke (Mubea Tailor Rolled Blanks); Prof. A. Schumacher (Universität Wuppertal)
- 09:40 **Automatic Generation of Robustness Knowledge for Selected Crash Structures**
C. Diez, C. Wieser, L. Harzheim (Adam Opel); Prof. A. Schumacher (Universität Wuppertal)
- 10:00 **Process to Improve Optimization with Combined Robustness Analysis Results**
D. Borsotto, L. Jansen, C. Thole (Sidact)
- 10:20 **Coffee break**

PARALLEL SIMULATION DATA MANAGEMENT AND COMPRESSION

- 11:00 **LoCo - Multistage Assembly with a Wheel Generation Process Example**
A. Saharnean, M. Thiele, D. Rentsch (SCALE)
- 11:20 **Reducing Storage Footprint and Bandwidth Requirements to a Minimum: Compressing Sets of Simulation Results**
S. Mertler, S. Müller (Sidact)
- 11:40 **Compression Methods for Simulation Models in SDM Systems**
J. Richter, W. Graf (TU Dresden); M. Büchse, M. Thiele, C. Löhnert, M. Liebscher (SCALE)
- 12:00 **Managing a Global IT Infrastructure for CAE**
C. Woll (GNS Systems)
- 12:20 **Lunch break**

PLENUM KEYNOTE PRESENTATIONS

- 13:40 **Insassensimulation Kindersicherheit bei Mercedes-Benz**
H. Ipek, J. Fausel (Daimler)
- 14:10 **Historische Entwicklung Funktionssimulation bei der Porsche AG***
M. Geuther (Dr. Ing. h.c. F. Porsche)
- 14:40 **Einsatz der Umformsimulation in der Modellierung und Verfahrensentwicklung von Blechumformprozessen**
Prof. M. Liewald (Universität Stuttgart)
- 15:10 **Coffee break**

PARALLEL CRASH (COMPOSITES)

- 15:50 **Herausforderungen bei der Crashesimulation von glasgewebeverstärkten Thermoplasten**
M. Wrensch, D. Binszowski (Brose Fahrzeugteile)
- 16:10 **Geschlossene Prozesskette für kurzfaserverstärkte Kunststoffe mit LS-DYNA**
B. Lauterbach, M. Erzgräber (Adam Opel); C. Liebold, M. Helbig, A. Haufe (DYNAmore)
- 16:30 **Interactive Fracture Criterion for SGF-PP: Validation on Lower Bumper Support**
M. Nutini, M. Vitali (LyondellBasell); M. Erzgräber, B. Lauterbach (Adam Opel)
- 16:50 **Crashesimulation langfaserverstärkter thermoplaste mit Berücksichtigung von Schädigung und Versagen**
L. Schulenberg, J. Lienhard (Fraunhofer IWM)
- 17:10 **Coffee break**

PARALLEL ARENA 2036

- 17:40 **ARENA2036 – Above and Beyond**
J. Dittmann, P. Middendorf (Universität Stuttgart)
- 18:00 **A Multiscale Approach for the Mechanical Investigation of Textile-Based Composite Structures within a Closed Process Chain**
M. Holzapfel, M. Vinot (DLR); C. Liebold (DYNAmore)
- 18:20 **Textile Process Simulation for Composite Structures**
H. Finckh, F. Fritz (ITV Denkendorf)
- 18:40 **Closing the Simulation Process Chain using a Solver Independent Data Exchange Platform: The Digital Prototype**
C. Liebold, A. Haufe (DYNAmore)
- 19:15 **Reception in the exhibition hall**
- 20:00 **Gala dinner in the "Hegelsaal"**

MATERIALS (PARAMETER IDENTIFICATION)

- Experimental and Numerical Investigations on Deformation and Damage Behavior of a Thermoplastic Component**
J. Irslinger (Daimler); M. Helbig, D. Koch (DYNAmore)
- Calibration and Appliance of the Wilkins Damage Model for Aluminium Cast Alloys**
C. Mühlstätter (Leichtmetallkompetenzzentrum Ranshofen)
- Dynamische Materialcharakterisierung von Kunststoffen – Entwicklung in den letzten 10 Jahren**
A. Fertschej, B. Jilka, P. Reithofer, M. Rollant (4a engineering)
- 4a impetus Hands on: Neuerungen – Prüfmethode, SAMP, Anisotropie, Composites, ...**
A. Fertschej, B. Jilka, P. Reithofer, M. Rollant (4a engineering)

MATERIALS (SHORT FIBER-REINFORCED POLYMERS)

- Einige Aspekte zur Charakterisierung und Modellierung unverstärkter und kurzfaserverstärkter Polymere in der Crashesimulation**
M. Vogler, G. Oberhofer, H. Dell, H. Gese (Matfem Partnerschaft Dr. Gese & Oberhofer)
- Potenzial von MAT157 für kurzfaserverstärkte, spritzgegossene Kunststoffbauteile**
W. Korte, M. Stojek, S. Pazour (Part Engineering)
- Modeling of Fiber-Reinforced Plastics Taking into Account the Manufacturing Process**
C. A. T. Reclusado (Fraunhofer EM); S. Nagasawa (Fuji Heavy Industries)
- *MAT_4a_micromec – Micro Mechanic Based Material Model**
A. Erhart, S. Hartmann (DYNAmore); B. Jilka, P. Reithofer (4a engineering)

NOISE, VIBRATION AND HARSHNESS

- NVH Simulations for Car Seat**
T. Kupczyk, L. Guerin (Faurecia Automotive Seating)
- Model Set up and Analysis Tools for Squeak and Rattle in LS-DYNA**
T. Fokolidis (Beta CAE Systems); J. Weber, M. Moridnejad (Volvo Car Group)
- Evaluation of Equivalent Radiated Power with LS-DYNA**
Y. Huang (LSTC)
- Eigensolution Technology in LS-DYNA**
R. Grimes (LSTC)

MATERIALS (MISC.)

- Simulations and Optimisation of Functionally Graded Auxetic Structures**
N. Novak, Prof. M. Vesenjak, Prof. Z. Ren (University of Maribor)
- Novel Approach to Model Laminated Glass**
R. Böhm, A. Erhart, A. Haufe (DYNAmore)
- Nichtlineare Viskoelastizität in der Crashesimulation: Modellierung offenzelliger Polymerschäume**
V. Effinger (DYNAmore)
- Modellierungsansätze für die Crashesimulation von endlosfaserverstärkten Polymeren**
M. Vogler, G. Oberhofer, H. Dell, H. Gese (Matfem Partnerschaft Dr. Gese & Oberhofer)

PROCESS (ENDLESS FIBER-REINFORCED POLYMERS)

Finite Element Simulation of Delamination Processes when Side Milling the Edges of Cross-Ply Carbon Fiber Reinforced Polymer (CFRP) Boards
H. Vazquez Martinez, P. Esch, K. Patel (Fraunhofer IPA)

BMBF MAI qfast: Endlosfaser-Bauteilauslegung und -validierung mit Ultrasim
S. Ebli, A. Wüst, S. Glaser (BASF)

Berücksichtigung der umformbedingten Faser-Reorientierung bei der Verzugsimulation von CFK-Bauteilen
C. Amann, S. Kreissl, H. Grass, J. Meinhardt (BMW); C. Liebold (DYNAmore); Prof. M. Merklein (Universität Erlangen-Nürnberg)

Forming Simulations in LS-DYNA using the Material Law 249
B. Eck, G. Chambon (Faurecia Automotive Exteriors)

PROCESS (WELDING AND COOLING)

High Performance Computing Welding Analysis with DynaWeld and Parallelized LS-DYNA Solvers
T. Loose (Ing.büro T. Loose); M. Bernreuther, J. Herzer (Universität Stuttgart); Prof. U. Göhner (DYNAmore)

Simulation of Pulsed Water Cooling for Continuous Casting with LS-DYNA
S. Scheibelhofer, J. Kronsteiner, S. Ucsnik (Leichtmetallkompetenzzentrum Ranshofen)

Durability Assessment of Welded Structures Based on Welding Simulation with LS-DYNA

ORGANIZATION

Venue

The congress venue with its impressive architecture between industrial and feel-good lifestyle is a well known host for conferences. Located right on the banks of the river Regnitz, the hotel is only a few walking minutes away from the historic city center of Bamberg.

Address:

Welcome Kongresshotel Bamberg
Mußstraße 7
96047 Bamberg, Germany

Bamberg

The beautiful German city with its historic center is listed as an UNESCO world heritage site since 1993. It is an outstanding example of a central European city that has grown and evolved around a core from the Middle Ages, which forms one of the largest intact old town centers in Europe.

Accommodation

A restricted number of reduced-price rooms have been reserved for Forum guests at the conference hotel until 19 July under the keyword "LS-DYNA Forum". Please book your hotel room in the conference hotel via a link on our conference website www.dynamore.de/forum2016-e. Further hotels in walking distance to the Kongresshotel which you may chose for yourself: Hotel Tandem, Hotel SandStern, Palais Schrottenberg, Alt-Ringlein, Hotel am Dom, Hotel Brudermühle, Hotel Wohnbar.

Participant fees

Industry: 580,- €
Academic: 410,- €

All prices per person plus VAT if applicable.

Fees include conference attendance, conference proceedings, participation at the evening events, lunches and coffee breaks.

Exhibiting and sponsoring

Please request further information, if you are interested in exhibiting or sponsoring the event.

Conference language

German and English. The keynote presentations on Monday and Tuesday are simultaneously translated into English.

DYNAmore GmbH

The DYNAmore GmbH is your contact for consulting, training, support and distribution of the finite element software LS-DYNA and numerous finite element models for crash simulation.

You will find DYNAmore in Stuttgart, Dresden, Ingolstadt, Berlin, Langlingen, Zurich (CH), Linköping (S), Gothenburg (S) and Torino (I).

Contact

DYNAmore GmbH
Carina Sieber

Electromagnetism in LS-DYNA

Date: 4 October
 Course fee: 550,- €*
 Location: Stuttgart
 Lecturer: İñaki Çaldichoury (LSTC)

The Electromagnetics (EM) module in LS-DYNA solves the Maxwell equations in the Eddy-Current approximation. The solver is coupled with the solid mechanics and thermal solvers of LS-DYNA allowing the simulation and solution of applications such as magnetic metal forming, welding, bending, induced heating, resistive heating and so forth.

The course includes a presentation of the solver's general principles, a complete description of the associated keywords as well as an introduction to the more advanced features (inductive heating problems, exterior magnetic field, magnetic materials).

Key electromagnetic concepts are reviewed throughout the course. General knowledge about electromagnetics is appreciated, but not mandatory.

ICFD Incompressible Fluid Solver in LS-DYNA

Date: 5 - 6 October
 Course fee: 1.100,- €*
 Location: Stuttgart
 Lecturer: İñaki Çaldichoury (LSTC)

This course provides an introduction to the incompressible fluid solver (ICFD) in LS-DYNA. It focuses on the solution of CFD problems, where the incompressibility constraint may be applied, e.g. ground vehicle, aerodynamics, hemodynamics, free-surface problems, ship hydrodynamics, etc.

The first day of the course includes a presentation of the general principles and applications of the solver, a step by step guide to setting up a simple CFD problem, advanced feature introduction (FSI, conjugate heat transfer) and so forth. The second day will deal with the newly implemented features and advanced applications. No expert knowledge is required as there will be a brief review of basic fluid mechanics and CFD concepts.

Concrete and Geomaterial Modeling

Date: 6 - 7 October
 Course fee: 1.100,- €*
 Location: Stuttgart
 Lecturer: Dr. Len Schwer (Schwer Consulting)

The course starts from the common ground of introductory metal plasticity constitutive modeling and successively builds on this base adding the constitutive modeling features necessary to model concrete and geomaterials.

The LS-DYNA constitutive models covered are adequate for modeling most types of rock, all kind of concrete, and a large class of soils. The course is intended for those new to concrete and geomaterial constitutive modeling, but will also be useful to those seeking a more in-depth explanation of the LS-DYNA concrete and geomaterial constitutive models covered.

Mit freundlicher Genehmigung:
Schwer Engineering

CESE Compressible Fluid Solver in LS-DYNA

Date: 7 October
 Course fee: 550,- €*
 Location: Stuttgart
 Lecturer: İñaki Çaldichoury (LSTC)

The new compressible flow solver CESE in LS-DYNA is based on a novel method that includes a unified treatment of space and time by the introduction of a conservation element (CE) and a solution element (SE), which allows for more accurate solutions of the shock waves than normal second order schemes. Attendees of this seminar will be given an introduction to apply this method for their simulations.

So far, CESE has been used to solve many different types of flow problems, such as detonation waves, shock/acoustic wave interaction, cavitating flows, and chemical reaction flows. In LS-DYNA, it has been extended to also solve fluid-structure interaction (FSI) problems with the embedded (immersed) boundary approach or moving (fitted) mesh approach.

NVH and Frequency Domain Analysis with LS-DYNA

Date: 13 - 14 October
 Course fee: 1.100,- €*
 Location: Stuttgart
 Lecturer: Dr. Yun Huang (LSTC)

In this seminar, an overview is given on the acoustic and frequency domain vibration features of LS-DYNA. It will particularly focus on the application of these features in vehicle NVH simulation.

The seminar addresses engineers and researchers who are working in the area of vehicle NVH, aircraft/spacecraft vibro-acoustics, engine noise simulation, machine vibration testing and simulation, etc. All required knowledge to run these simulation problems with LS-DYNA will be presented in detail.

Meshfree EFG, SPG, Advanced FE Methods

Date: 13 - 14 October
 Course fee: 1.100,- €*
 Location: Stuttgart
 Lecturer: Dr. Wei Hu (LSTC)

Attendees of this seminar will be introduced to the fundamental background of various Meshfree and advanced FEM methods. Particular attention is drawn to the application of the meshless method "Element-Free Galerkin" (EFG) as well as the newly developed method "Smoothed Particle Galerkin" (SPG).

The seminar will thoroughly refer to the settings required in the LS-DYNA input deck to carry out a successful nonlinear meshfree or advanced FEM simulation. Common applications of these methods are materials made of rubber or foam that undergo large deformations. The adaptive EFG formulation is the method of choice for the efficient simulation of cutting, bulk forming and forging processes.

Methods for Simulating Short Duration Events

Date: 13 - 14 October
 Course fee: 1.100,- €*
 Location: Stuttgart
 Lecturers: Paul Du Bois (Consultant);
 Dr. Len Schwer (Schwer Consulting)

This two day class provides instruction on the selection and use of the LS-DYNA solvers used for analyzing blast and penetration related problems. It addresses experienced LS-DYNA analysts of typical Lagrange analyses.

Schwer Engineering

The training class will provide additional tools and knowledge required to make appropriate modeling decisions and convey the level of confidence in predictive results. Insights into modeling and simulation are illustrated through examples and numerous modeling 'tricks' and options are discussed. An emphasis is placed on modeling techniques, guidelines for which technique(s) to select, which techniques work well and when, and possible pitfalls in modeling choice selections.

Blast Modeling with LS-DYNA

Date: 17 - 18 October
 Course fee: 1.100,- €*
 Location: Stuttgart
 Lecturers: Paul Du Bois (Consultant);
 Dr. Len Schwer (Schwer Consulting)

LS-DYNA is unique in offering analysts the choice of Lagrange, Eulerian (ALE) and Simple Engineering solvers, and a combination of these solvers. For example for simulating high energy events such as blast loading. In addition to air blast, the traditional focus of blast modeling has recently become important.

This class focuses on the application of LS-DYNA for the simulation of high energy events. Methods of analysis and modeling are illustrated through case studies. However, this training class is not a substitute for the in-depth treatments presented in the associated LS-DYNA training class, i.e. "ALE/Eulerian and Fluid Structure Interaction."

LS-OPT – Optimization and Robustness

Date: 18 - 20 October
 Course fee: 1.425,- €*
 Location: Stuttgart
 Lecturer: Katharina Witowski (DYNAmore)

LS-OPT is an independent, comprehensive optimization program from LSTC. It is ideal for solving strongly non-linear optimization problems and is highly suitable for use in combination with LS-DYNA or any other solver. LS-OPT functions on the basis of a special, highly effective response surface method.

Mit freundlicher Genehmigung:
Hyundai Motor Company

The program also includes stochastic methods for assessing the robustness of FE models and illustrating dependencies between optimization variables and desired values. Input from the user is supported by a comfortable graphical user interface. The seminar gives an introduction to the program LS-OPT. General theoretical aspects of the Response Surface Method are discussed and the possibilities of applying this method in LS-OPT are especially explained.

Penetration Modeling with LS-DYNA

Date: 19 - 20 October
 Course fee: 1.100,- €*
 Location: Stuttgart
 Lecturers: Paul Du Bois (Consultant);
 Dr. Len Schwer (Schwer Consulting)

In addition to high energy events, penetration events are typically associated with large deformations, damage, and failure both on the material and structural level. During the past decade successful modeling of such damage and failure has moved steadily from a "Black Art" to a widely accepted engineering practice.

French-German Research Institute of Saint-Louis (ISL)

This class focuses on the application of LS-DYNA and provides analysis methods and modeling techniques, which are illustrated through case studies. However, this training class is not a substitute for the in-depth treatments presented in the associated LS-DYNA training classes, i.e. "ALE/Eulerian and Fluid Structure Interaction" and "Smoothed Particle Hydrodynamics (SPH) in LS-DYNA", respectively.

Explosives Modeling for Engineers

Date: 21 October
 Course fee: 550,- €*
 Location: Stuttgart
 Lecturers: Paul Du Bois (Consultant);
 Dr. Len Schwer (Schwer Consulting)

LS-DYNA simulations involving explosives can be modeled on several engineering levels from simple application of equivalent pressure histories via *LOAD_BLAST_ENHANCED, explicit inclusion of explosive charges using Equations-of-State and detonation via *INITIAL_DETONATION, detonation of explosive due to impact using *EOS_IGNITION_AND_GROWTH_OF_REACTION_IN_HE.

This training class is intended for the experienced LS-DYNA analyst associated with typical Lagrange and Multi-Material Arbitrary Lagrange Eulerian (MM-ALE) analysis. The training class will provide the analyst with the additional tools and knowledge required to model explosives for a range of applications.

Integrative simulation of short-/long glass fiber reinforced plastics with LS-DYNA

Date: 10 October (9:00 - 12:00)
 Course fee: Free of charge
 Location: Bamberg
 Lecturer: 4a engineering / DYNAmore
 Language: German

With fiber-reinforced plastics, the resulting fiber orientations in the molded component lead to many local anisotropies. To obtain accurate simulation results, these anisotropies should be incorporated in the structure simulation. One way to achieve this is by transferring the computed fiber orientations from a previous injection molding simulation to the structure simulation using a mapping program.

The goal of this workshop is to present this integrative simulation approach in detail, to explain its advantages and to demonstrate a procedure to include micromechanics with the aid of an example. Furthermore, the possibilities of such material modeling using 4a impetus are shown and the approaches and possibilities of *MAT_157 and *MAT_215 are discussed.

* 10% discount for participants of the LS-DYNA Forum.
 All prices plus VAT.
 Event fees include course materials, lunch and beverages.
